

MindManager®

What's New in MindManager 2019 for Windows

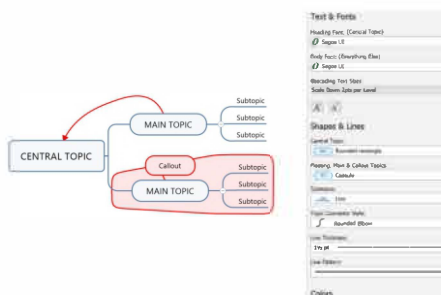

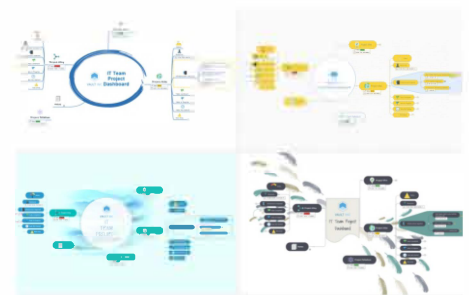

Transcend the limits on what you can see, create, communicate and achieve

The most robust, customizable information visualization software available, MindManager 2019 for Windows empowers you to uncover hidden possibilities, unite information and people, and unleash productivity to do great work faster than ever.

Theme Designs

Fresh colors, modern fonts and personality-packed designs set an immediate tone for your presentation, and instantly convey subtle yet significant messages about your brand, style, and content.

- Choose from 40+ stunning new visual themes, from polished to whimsical to dramatic
- Transform any map's look, feel and tone with a single click
- Effortlessly switch themes for different audiences and purposes

Easy Theme Editor

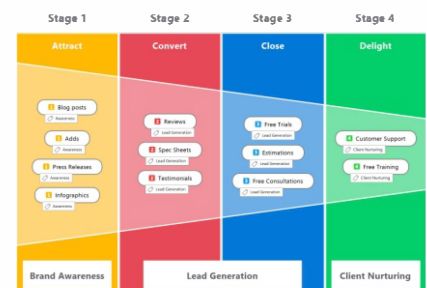

Small visual details can have a big communication impact. Our theme editing tools have been streamlined into clean, easy-to-use menus. With just a few simple clicks, you can fine-tune any map's look to say exactly what you want it to.

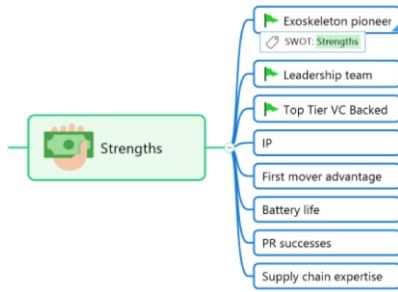

- Easily adjust topic text, fonts, shapes, lines, colors and more
- Change a map's visual theme without changing its structure
- Create customized visualizations aligned with your brand, content, & vision

Objects & SmartShapes™

Group topics or process parts within shapes to distinguish areas of importance, or combine customizable SmartShapes™ to build new templates and diagram types that support your unique objectives.

- Enrich, clarify and expand map content with 12 new shapes including stars, arrows, brackets, funnels and many others
- Easily group content to define processes, illustrate concepts and more
- Create custom diagrams quickly and easily with new smart funnels & matrices

Match Width

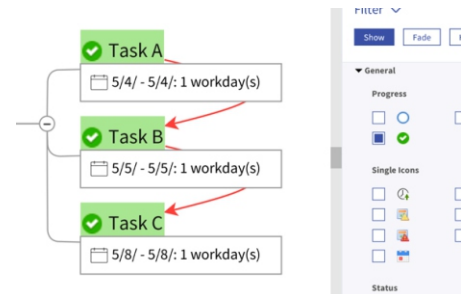

Easily eliminate inconsistencies in topic alignment, so your audience will immediately focus on your presentation's content, instead of its structure.

- Standardize topic width to create more readable & engaging presentations
- Adjust topic width manually or with a single click
- Apply changes to individual topics or entire maps

HTML5 Export & Publish Filtering

With new filtering and linking capabilities, recipients of your shared maps can more quickly and easily find the information you want them to see, moving projects and conversations forward.

- Make shared maps easier for people to navigate, understand and respond to
- Exported & published maps can be filtered on icons, tags, resources and saved Power Filter queries
- Create direct topic links to visually guide recipients to the content you want them to see

#	E...	Preview	Title	Applies To	O...	Triggers
4		Topic	Stage 1 icon	All Topics	No	Topic is within or
5		Topic	Stage 2 icon	All Topics	No	Topic is within or
6		Topic	Stage 3 icon	All Topics	No	Topic is within or
7		Topic	Stage 4 icon	All Topics	No	Topic is within or
8		Topic	Tag Awareness	All Topics	No	Topic is within or
9		Topic	Tag Lead Generation	All Topics	No	Topic is within or within or overlap

SmartRules™

SmartRules™ extends and exceeds conditional formatting, reducing repetitive tasks and transforming maps from simply representing your processes and workflows, to driving and accelerating them.

- Write rules that change topic icons, tags, properties, progress & priority markers, based on specific triggers
- Apply SmartRules to individual objects or topics, select branches or full diagrams
- Automate content updates to task lists, project plans, flowcharts and more, saving time and igniting productivity

PLUS

Expanded Icon Library

Add vast amounts of visual data with 500+ new & enhanced icons

Enhanced Menu Design

Work more efficiently with our clearer, more user-friendly menu

New Imports

Evolve and improve on content created in other mapping applications
